

## Name Index

Vol I: Main Study

Vol II: Historical Documents

Vol III: Armstrong High School

Vol IV: Cardinal Ridge/Grant Perkins Study

Vol V: Students, Teachers and Schools

Vol VI: Name Index To Conklin Study.

Index by Name and Topic

Names in Red were students taught by Christine Allen or Mary Dean Johnson. All others were family members or some other personality mentioned in the study. Students at Conklin not taught by Christine Allen or Mary Dean Johnson are in Green. IF a student, the name will have a reference in the far right column as well.

Because the study is ongoing, we don't cross reference by page, only by Volume and Chapter. Many names are mentioned in more than one volume, so check each column volume.

**Volume III: Armstrong Technical High School.** When Christine Allen graduated, many of her friends signed an autograph book, a common practice at the time. Unfortunately, the yearbook has disappeared, so we know little about the students other than what they revealed or what I've found from other sources. Each is listed in the master index with a ATHS after their name. There is some overlap in name spellings with people who lived in Loudoun and studied at Conklin. Further research will determine if they are the same person or of the same family.

Some of the names in the book are instructors, authors of works Christine Allen studied, or just friends who might or might not have attended Armstrong. For example, in Volume III, Chapter 3.4 mention is made of Mitt and Jennie Warner of Philomont. That's quite close to Conklin.

**Volume V, Students and Teachers:** That volume has a list of students organized alphabetically by student name. Family members are cross referenced by the student. Students just get an X, Edward Allen (a student) is in **Red** in the name column and

**Conklin Study Name Index, By Larry Roeder First Edition April 6, 2014**

marked by an X on his row in the column marked Vol 5. However, a relative like his father Isach Allen is cross referenced in the Vol 5 column by Edward Allen. If Edward were mentioned in some other volume then the sections of that volume would be mentioned in the relevant column. If Edward is mentioned in some part of Vol 5 other than in the list, he will also be cross referenced by that section.

Spellings are as reported in the Census or other records. These variable at times, so be cautious. Also be aware that some names are used by more than one person.

<sup>1</sup> An X in this column means the name is associated with a student in Conklin or in some school instructed at by Christine Allen or Mary Dean Johnson. A name in the column refers to a reference point in Vol V. In other words if a name in column one is cross referenced by a name in the last column, this means you can look up the name in the first column by looking up the name in the last column, usually within a family history block of information.
